DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a ligand binding to the hypusine region of eukaryotic initiation (spelling error in claim 1) factor 5A.

Group II, claim(s) 4-12, drawn to a method of distinguishing proliferating cells from non-proliferating cells.

Group III, claim(s) 13-15, drawn to a method of diagnosing a hyperproliferative disorder.

Group IV, claim(s) 16-21, drawn to a method of diagnosing intraepithelial neoplasia.

Group V, claim(s) 22-24, drawn to a method of determining in a biological sample the concentration of hypusine.

Group VI, claim(s) 25-27, drawn to a method for inhibiting in a cell comprising administering a nucleic acid molecule encoding an antibody.

Group VII, claim(s) 28-37, drawn to a method of screening a therapeutic agent.

Group VIII, claim(s) 38, drawn to a method of quantifying the response to proliferation-modifying therapies.

Group IX, claim(s) 39-40, drawn to a ligand specific for the folate-binding region of eukaryotic translation initiation factor 5A.

Group X, claim(s) 41-42, drawn to a method for identifying folate derivatives.

Group XI, claim(s) 43, drawn to a method for inhibiting in a cell the biological activity of the folate-binding region.

The inventions listed as Groups I-XI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the first invention in claim 1 does not contribute over the art since Xu et al., JBC 2001 Jan 26;276(4):2555-61, teaches a ligand binding to the hypusine region of eukaryotic initiation factor %A.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
